NUS
CITIES Lecture Series

How can Cities become Vibrant – to meet the Climate, Social, and Economic Challenges of Tomorrow?

Cities are increasingly challenged by intertwined and compounded crisis—from pandemics to climate change, and conflict in many regions around the world. How can cities meet today's economic, social, and climate-related challenges while preparing for those of the future? How can cities provide equality and inclusivity, remain centers of economic growth, and become more resilient to shocks and low carbon at the same time?

The presentation and discussion will:

(a) present new analysis from a forthcoming World Bank report to explore the intricate linkages between a range of topics including urban inequality, economic development, land use and transport policies

(b) draw lessons and policy insights from various World Bank's engagements and activities with cities faced by multiple acute crises

Lecture by Jon Kher Kaw

Senior Urban Development Specialist, World Bank

On 19th Dec 2023, 6:30 p.m. (SGT)

Registration starts 6 p.m. onwards

At NUS SDE3 Level 4, In Lecture Theatre LT421

Register Via QR Code as Limited Seats only!

2 CPD Points for SIP and SILA | Pending for BOA SIA and SISV
