Synopsis

Ever wondered how a modern zoo balances animal encounters with responsible environmental stewardship? Join us as Ms. Rohaya Saharom, Vice President of Sustainable Solutions at Mandai Wildlife Group (MWG), reveals the secrets behind their exciting Mandai Rejuvenation Project!

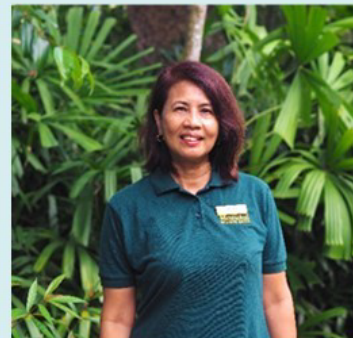

During this session, she would share the challenges faced and how MWG overcame them when building the new parks while ensuring minimal impact and strong environmental focus in compliance with Environmental Impact Assessment. She would also share how MWG operates sustainably and ethically as a modern zoological institution, and their journey to be a net zero organisation well before 2050.

This isn't just a talk - it's a front-row seat to the future of zoos, where wildlife thrives, nature flourishes, and sustainability reigns supreme.

Speaker's Biography

After more than 30 years of tackling pollution, shaping policies and advocating for global environmental agreements within Singapore's public sector, Rohaya switched gears in 2021. Embarking on a new chapter, she now serves as a dynamic sustainability champion at the Mandai Wildlife Group in her role as Vice President, Sustainable Solutions. In this capacity, she leads a team dedicated to implementing sustainability best practices within the Mandai Wildlife Reserve while harnessing her extensive background in environmental policy development and implementation to drive the Group's ambitious journey towards carbon neutrality and net zero.

Rohaya and her team also provides environmental stewardship, ensuring that the Mandai Rejuvenation Project adheres to the core principles of environmental and wildlife protection throughout the development phase. This commitment has resulted in the execution of measures aimed at safeguarding flora and fauna, not only upholding the project's integrity but also serving tangible examples of practical environmental stewardship.

Ms Rohaya Saharom

Vice President, Sustainable Solutions
Mandai Wildlife Group (MWG)

Come join us! Light refreshments served.

29 February 2024 (Thursday) | 7.00pm-8.15pm

ABOUT THE PROGRAMME

MEM5104 Seminars on Environmental Management is an essential part of the academic experience for students studying the Master of Science (Environmental Management) programme. This series of seminars aim to cover a wide range of educational topics that are relevant to the field. They are delivered by prominent practitioners and researchers from Singapore and abroad who are well-versed in the subject matter. Through lively discussions and engaging presentations, participants will gain a deeper understanding of the topics covered.
