DIALOGUE ON CARBON CREDITS

21 FEBRUARY 2024
RVRC BLK G LEVEL 3
MASTER'S LOUNGE
7- 8.30PM

FOO TUN SHIEN

TECHNICAL CARBON SPECIALIST
CLIMATE IMPACT X

Carbon exchanges are being established across the globe to facilitate the trade of carbon credits. Carbon credits allow companies and organisations to compensate and contribute towards their decarbonisation strategies through supporting impactful climate projects, such as forest conservation, reforestation or renewable energy.

Join us for a session with **Foo Tun Shien, Technical Carbon Specialist at Climate Impact X**, a global marketplace and exchange based in Singapore for trusted carbon credits.

We will discuss about carbon credits and the role carbon exchanges play, how they are benefitting from Singapore's sustainability policies, and how organisations can leverage on these opportunities created.
