

✦ Join Seminar on Financing Nature: Addressing Challenges in Food Systems 🌍

|| 27 March

18 March 2026 || TO NUS Community

Sent on behalf of MSc Environmental Management (MEM) Seminars

Nature keeps our food on the table — but it's rarely priced into decisions. This talk will unpack the conservation funding gap, why financing nature is so tricky, and how food systems depend on ecosystems. Yap Su-E, Regenerative Food Facility Lead at The Nature Conservancy will share insights on we can drive transformative change in food systems. The Q&A session will be moderated by Marvin Joseph Montefrio, Associate Professor at the Department of Sociology and Anthropology at NUS.

📅 **Date: 27 March (Fri) 2026**

Synopsis

Nature underpins our food systems, yet its value is often overlooked in economic decision-making. This presentation explores why nature is critical, the financing gap that threatens conservation, and the systemic challenges that make funding complex. We will examine how food systems interact with nature and the growing corporate interest in sustainability and resilience. Finally, we will share The Nature Conservancy's approach, including lessons from Foodscapes and place-based strategies, along with examples of innovative financing structures that can drive transformative change.

Speaker

YAP SU-E

REGENERATIVE FOOD FACILITY LEAD, THE NATURE CONSERVANCY

Yap Su-E is the global lead for The Nature Conservancy's Foodscape Accelerator — a technical assistance facility that aims to scale up Regenerative Foodscapes around the world.

Previously, Su-E served as the Director for Corporate Engagement (Asia Pacific) for The Nature Conservancy where she worked with private sector players to mobilize capital and action for conservation.

Moderator

MARVIN JOSEPH F. MONTEFRIO

ASSOCIATE PROFESSOR, DEPARTMENT OF SOCIOLOGY AND ANTHROPOLOGY

Marvin was trained in political ecology, environmental sociology, environmental anthropology, environmental policy, and ecological economics. His primary research interest lies at the intersection of food, agrarian, and environmental studies, with a particular focus on the Southeast Asian context.

ABOUT THE PROGRAMME

MEM5104 Seminars on Environmental Management is an essential part of the academic experience for students studying the Master of Science (Environmental Management) programme. This series of seminars aim to cover a wide range of educational topics that are relevant to the field. They are delivered by prominent practitioners and researchers from Singapore and abroad who are well-versed in the subject matter. Through lively discussions and engaging presentations, participants will gain a deeper understanding of the topics covered.
