

Latest NUS Sustainability Report and Campus Sustainability Environmental Disclosures are out!

14 Aug 2026 || TO NUS Community

The third edition of the NUS Sustainability Report offers fresh stories of how the university is making a difference in environmental and climate-related sustainability.

This year's report is presented in a digital format for a more engaging online experience and includes a new Innovation & Enterprise section which spotlights startups conceived at NUS and/or built with NUS-developed technology.

Read the online report [here](#).

Complementing the NUS Sustainability Report is the Campus Sustainability Environmental Disclosures, which provides annual quantitative updates on the environmental performance of the university's campus administration and operations.
